Urine Culture Collection Instructions

HOW TO COLLECT THE SPECIMEN:
1) Submerge tip of transfer device to bottom of urine container.
2) Place BD Vacutainer Tube in holder portion of transfer device. Push tube all the way into holder.
3) Hold in position until urine stops flowing into tube.
4) Remove tube from transfer device and set aside. Lift transfer device and allow urine to drain from straw. Treat transfer device as a contaminated sharp and discard in a biohazard container approved for their disposal.
5) Shake tube vigorously. Label and send to laboratory.
